AVTS

AA SHIELD AIR VENTILATION TRAUMA SYSTEM

- ☞ Close-fitting increases air circulation and dramatically improves comfort
- ☞ Adjustable air volume design provides enhanced comfort and flexibility for different requirements
- ☞ Built-in trauma design reduces bullets' high speed impact and blunt-impact damage by more than 70%-80%
- ☞ It can be customized and a free combination. Components include: front and back chest, side ribs, waist and crotch

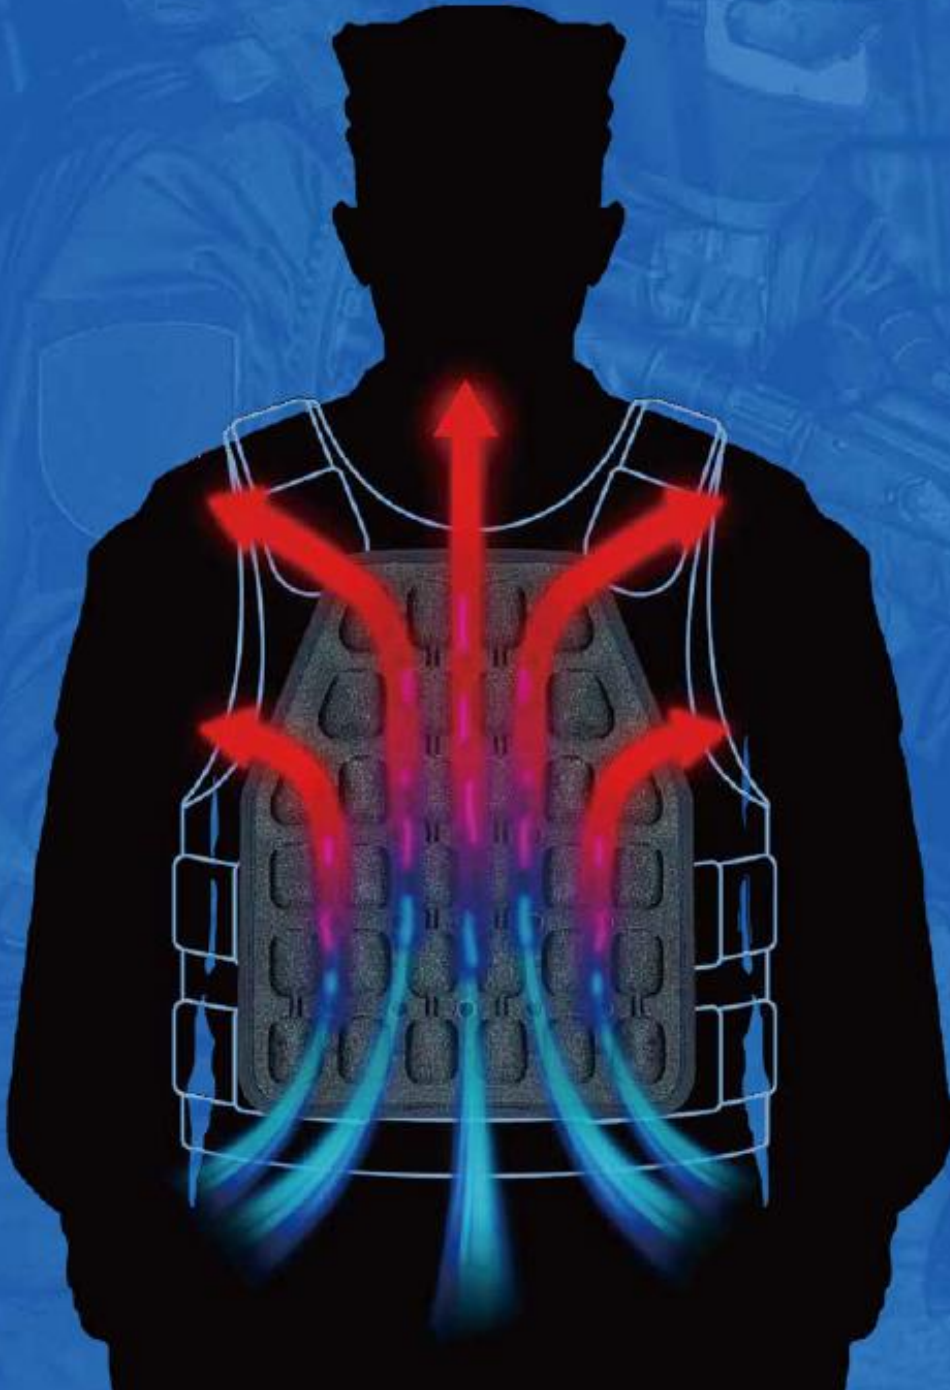

Your Vision is Our Mission.

AIR VENTILATION TRAUMA SYSTEM

"Comfort Plus Protection is Power"

Your Vision is Our Mission.

REFRESHING HEAT DISSIPATION

The height of each air bag is about 2mm,
and the shallow groove between the air bags enhances ventilation,
allowing heat dissipation and ventilation between the body and clothes

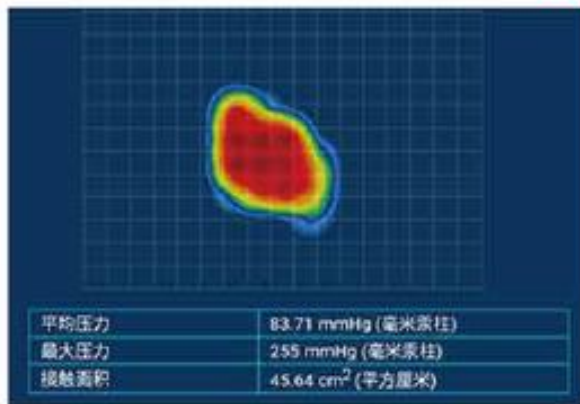

DECOMPRESSION VEST DISPERSION TEST

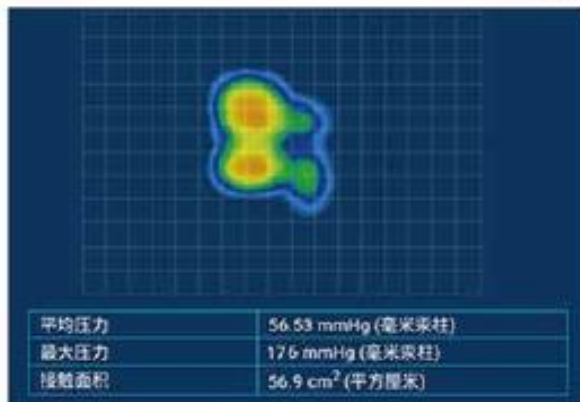

Test date: April 25, 2022

Test method: Put the pressure measuring pad on the table, male weight 90KG clenched his fist to press the table, and compare the maximum pressure before and after using AA Shield AVTS pad.

Don't use

After using

Test results: After using AA Shield AVTS pad, the maximum pressure value from the previous 255mmHg to 176mmHg, the impact force of body contact is reduced by about 30%, the experiment proves that AA Shield AVTS pad has the effect of impact force dispersion.

AIR VENTILATION TRAUMA SYSTEM

VEST AIR VENTILATION TRAUMA PAD

Type: Press Inflatable
Size: 24*29cm
Net weight: 186.6g/set
Application: Tactical Vests, Plate Carrier

SHOULDER AIR VENTILATION TRAUMA PAD

Size: 24*8.5cm
Net weight: 51.9g
Application: Vest Shoulder Pads, Marching Backpack

2.0 FAR INFRARED RELIEVING AVTS

Size: 27*6cm
Net weight: 83.8g
Application: Backpack

SHOULDER AIR VENTILATION TRAUMA PAD

Type: Press Inflatable
Size: 34.5*8.6cm
Net weight: 132g
Application: Shoulder Bag, Backpack

Your Vision is Our Mission.

MANUAL INFLATING IS MUCH EASIER

Use manual press mode
To adjust the air bag,
portable and convenient

AA Shield

Lycra fabric

1. Air flow filling, soft support
2. Environmentally friendly skin, breathable heat dissipation
3. Very elastic and resistant to deformation

OTHER

EVA MATERIAL

EVA filling, Easy to breed bacteria,
Easy to sultry, inelastic
Has peculiar smell
